

Support and services concepts · PROTOTYPE; no engineered stack or material model

Local support is separate from the module body

Routing topology and separate service functions

Dashed attachments and thermal bridges remain undefined.
Illustrative staggering; topology sketch, not to scale.

Module / electronics trial bodies

External carrier / cold rail keep-out
pixel 5 mm; short strip 6.6 mm; long strip 6.6 mm

LV supply + return / HV / monitoring

Data uplinks + clock / command

Coolant inlet

Coolant exhaust

Local bus / cooling → radial bay → axial annulus
→ rear collector → conditional vessel interface

Ancillary bundles already include electrical return.
Local cooling branches and grouped trunks are distinct.
