nODD · Ten |η| populations
Unbinned moments underlying the published width points

$0.0 \le |\eta| < 0.3$ — N = 973 · zero = 2 · mean = 1.012% · s = 0.564% · s / mean = 55.78%

$0.3 \le |\eta| < 0.6$ — N = 1,002 · zero = 5 · mean = 1.065% · s = 0.570% · s / mean = 53.56%

$0.6 \le |\eta| < 0.9$ — N = 1,009 · zero = 3 · mean = 0.964% · s = 0.513% · s / mean = 53.16%

$0.9 \le |\eta| < 1.2$ — N = 1,015 · zero = 1 · mean = 1.056% · s = 0.528% · s / mean = 49.97%

$1.2 \le |\eta| < 1.5$ — N = 999 · zero = 0 · mean = 1.112% · s = 0.540% · s / mean = 48.50%

$1.5 \le |\eta| < 1.8$ — N = 1,019 · zero = 5 · mean = 1.315% · s = 0.368% · s / mean = 27.95%

$1.8 \le |\eta| < 2.1$ — N = 1,007 · zero = 3 · mean = 1.362% · s = 0.386% · s / mean = 28.33%

$2.1 \le |\eta| < 2.4$ — N = 997 · zero = 2 · mean = 1.349% · s = 0.386% · s / mean = 28.58%

$2.4 \le |\eta| < 2.7$ — N = 943 · zero = 8 · mean = 1.274% · s = 0.480% · s / mean = 37.64%

$2.7 \le |\eta| \le 3.0$ — N = 1,036 · zero = 13 · mean = 1.215% · s = 0.471% · s / mean = 38.80%

Electrons / bin

Raw silicon response $R = E_{Si}/E_{true}$ [%]

All events retained · Dashed line: mean · s: sample standard deviation (ddof = 1)
No Gaussian fit · 10–80 GeV spectrum · Histogram bins do not enter the width calculation
