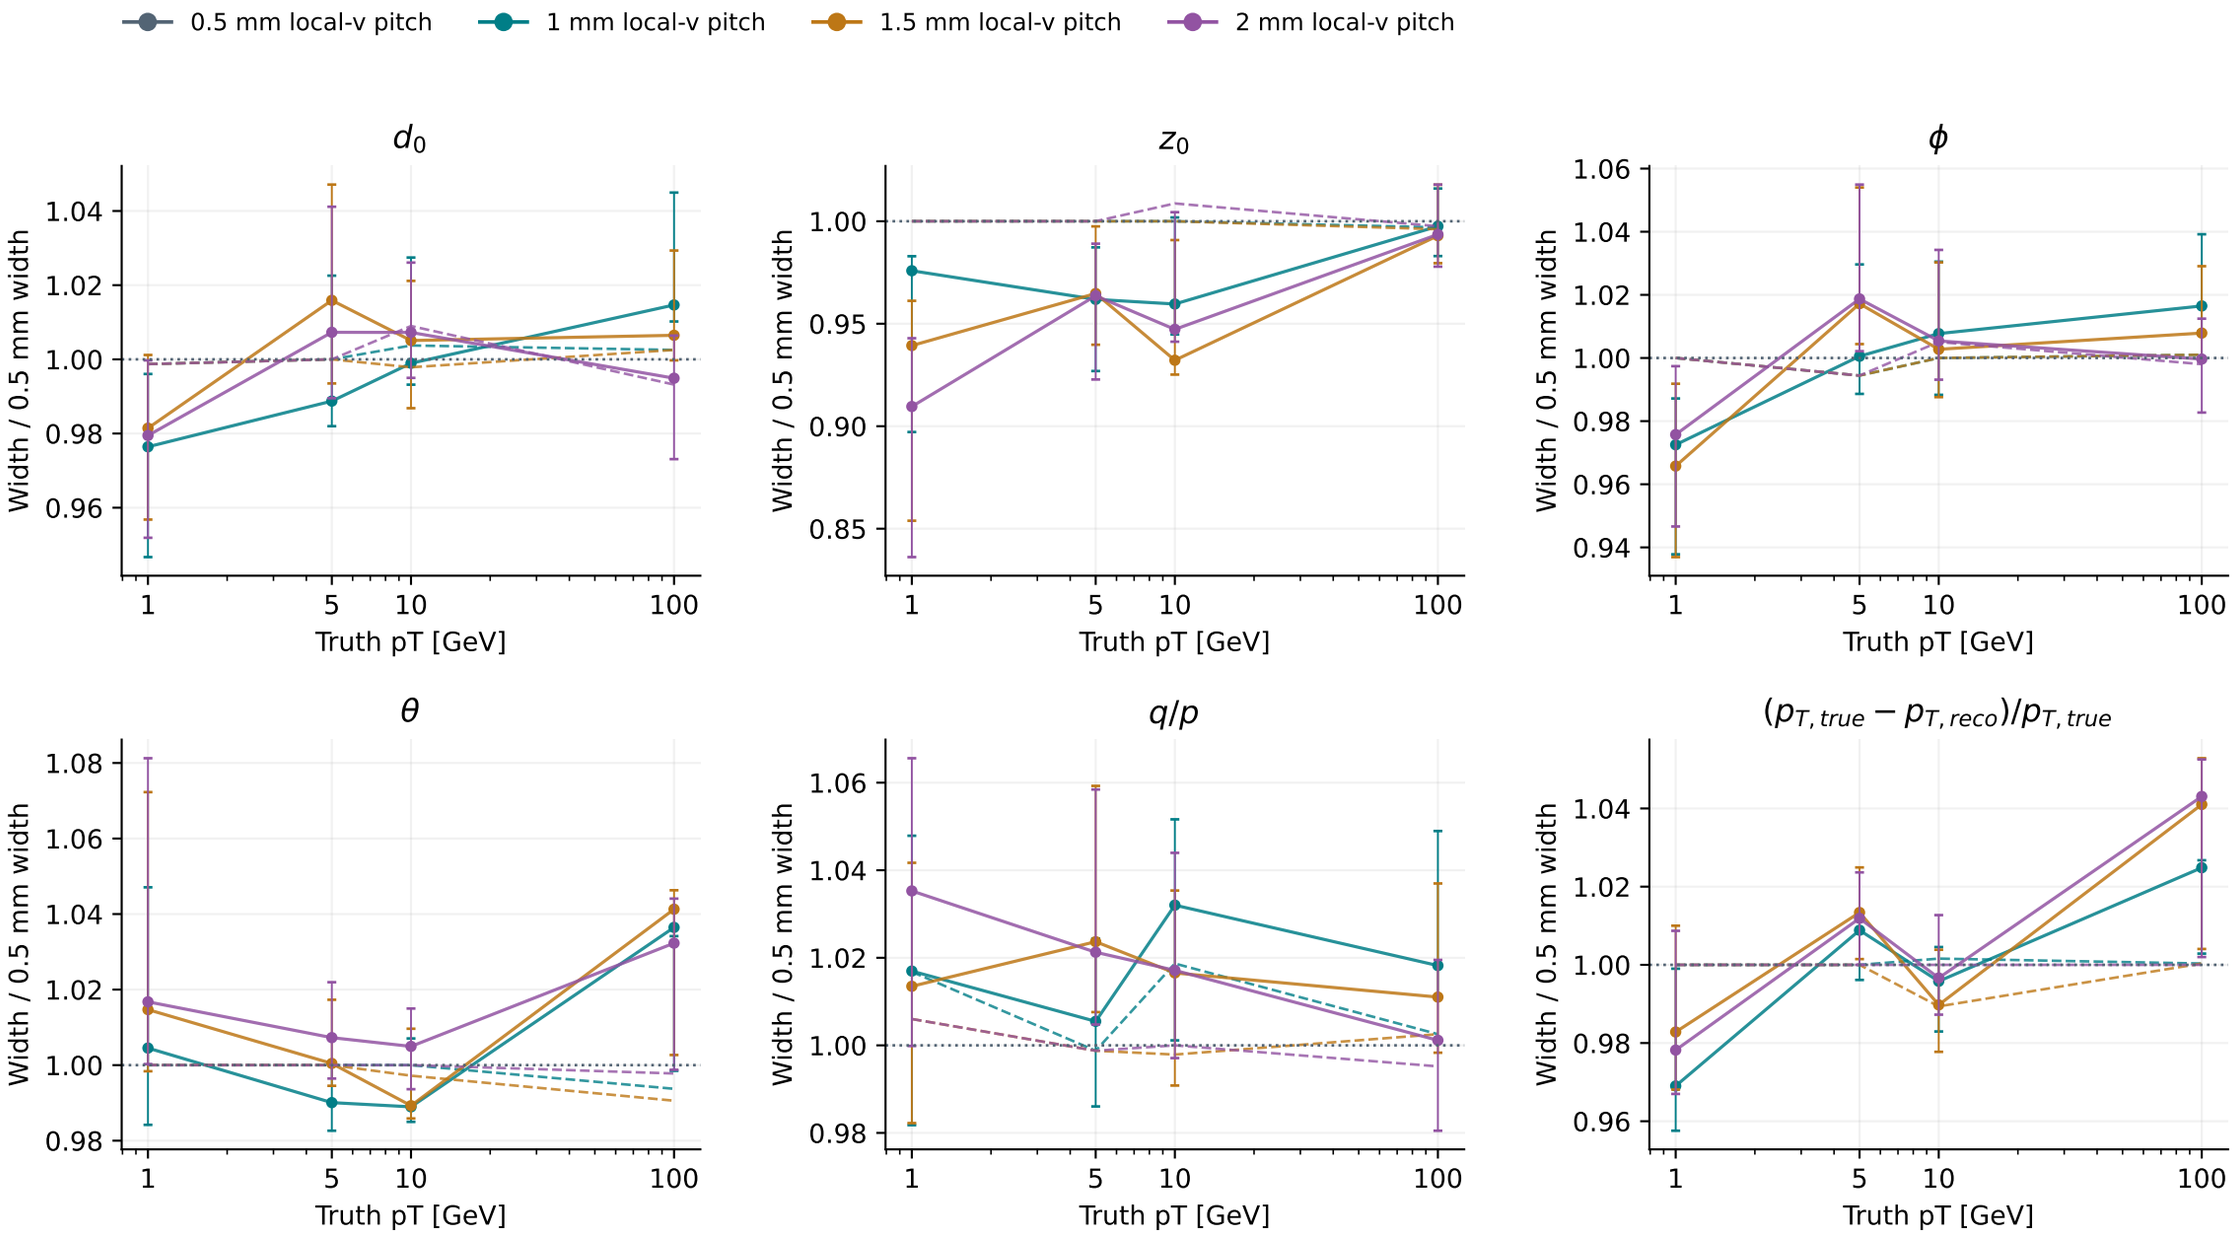
Fatras single electrons - resolution ratios

All truth η · finite matched-primary representatives · paired 68.27% bootstrap intervals · ≥30 entries



Solid: each pitch's finite successes. Dashed: common successful events at all four pitches.

Statistical intervals only. Scaled frozen Gaussian longitudinal response is not physical sensor calibration; boundary retries may alter non-target draws.

PROTOTYPE · PR104 balanced tracker · 3 T · pixel GBTS + full-sensor CKF + ambiguity resolution
